- Turkish (Fluent)
- English (Fluent)
- Japanese (intermediate)

CAREER SUMMARY

Experienced Backend Developer with 2 years of expertise in designing and implementing scalable web applications and API integrations. Skilled in Python (Django), Node.js (Express), and Next.js, with a strong foundation in e-commerce platforms, logistics integrations, and database management. Adept at optimizing performance, deploying applications with Docker, and collaborating within Agile teams. Passionate about building seamless digital experiences and continuously evolving with the latest technologies.

WORK EXPERIENCE

Backend Developer | Trair Technology Investments
Jan 2023 – Sep 2024

- Designed and implemented scalable backend systems using Django and Express.js
- Developed RESTful APIs and optimized database performance, reducing query execution time by 30%
- Integrated third-party logistics APIs (Hepsijet, Sürat Kargo, Yurtiçi Kargo) to streamline shipping operations
- Implemented payment gateway integrations including PayTR and Iyzico, enhancing secure transaction processing
- Deployed containerized applications using Docker, ensuring smooth CI/CD processes
- Worked within an Agile environment, utilizing Jira for task management and sprint planning

FREELANCE PROJECTS

Jewelry Store Website

- Tech Stack: Next.js (App Router), TypeScript, TailwindCSS, shadcn/ui, Framer Motion
- Optimizations: Implemented on-page SEO and accessibility standards with semantic HTML
- Features:
  - Developed a contact form backend with Nodemailer
  - Integrated Google Maps (iFrame) for store location display
  - Added a gallery page showcasing images and videos
  - Fully mobile-responsive design

AI-Powered Blog (In Progress)

- Tech Stack: Next.js (App Router), TypeScript, TailwindCSS, shadcn/ui, Framer Motion, MongoDB
- Backend Features:
  - User authentication & article CRUD operations
  - Plans to integrate an AI API for automated article generation
  - Fully mobile-responsive design
